EDUCATION

Bule Hora University

BSc. Computer Science & Eng.

Expected Graduation: 2026

Cumulative GPA: 3.7 / 4.0

TECHNICAL SKILLS

Java (Desktop & Android Native)

Python & API Automation

PHP & Web Development

BIRUK TADESSE

SOFTWARE ENGINEER & TRANSLATOR

PROFESSIONAL SUMMARY

I am a highly driven and elite 4th-year Computer Science and Engineering student at Bule Hora University with a strong academic foundation (3.7 GPA). I specialize in engineering scalable digital ecosystems, ranging from robust enterprise-level Java applications to responsive Web platforms. As a strict adherent to the Zero-Bug Policy and Clean Code principles, I possess a deep passion for translating complex algorithms into elegant, user-friendly software solutions.

In addition to my technical expertise in Full-Stack Web (HTML, CSS, JS, PHP) and App Development, I am highly skilled in cross-cultural software localization. I leverage advanced AI tools to provide highly accurate, fast, and context-aware English-to-Amharic and English-to-Afaan Oromo translations for web and mobile platforms. I am fully prepared to take on remote engineering, freelance web development, and professional translation roles.

FEATURED ENGINEERING PROJECTS

RLMS (Enterprise Registration & LMS)

2023 - Present

PHP 8.x | Vanilla JS | MySQL | HTML/CSS | AJAX

Architected and deployed a highly secure, 5-tier architecture Registration and Learning Management System.

HTML5, CSS3, & JavaScript

MySQL & Database Design

Software Architecture (Clean Code)

LANGUAGES & TRANSLATION

Highly proficient in providing highly accurate, culturally relevant translations for websites and applications.

English (Fluent / Translator)

Afaan Oromo (Native / Translator)

Amharic (Fluent / Translator)

- Implemented military-grade Two-Factor Authentication (2FA) and Smart Anti-Cheat Examination modules.
- Engineered an auto-grading mechanism and a seamless, Telegram-style encrypted chat hub for internal communication.

BHU Digital Examination System

2023

Java Swing | Advanced Java | MySQL | JDBC

Built a massive enterprise-level Java application from scratch to facilitate secure digital examinations for Bule Hora University students.

- Designed high-performance dynamic timers and real-time automated scoring logic.
- Integrated comprehensive and secure administrative dashboards for system monitoring.

Telegram API Automation Hub

2022 - 2023

Python | Telethon | API Integration

Developed complex bot solutions designed for large-scale group administration and mass user management. Leveraged Python Userbots and official Telegram APIs to automate massive organizational workflows, reducing manual moderation time by over 80%.

University Cafeteria Native App & Web Platform

2022

Java (Native Android) | Firebase | PHP | JS

Designed a dual-platform solution to modernize the university dining experience. Created a Native Android App for students and a Web-based administrative platform, seamlessly synchronized through a centralized Firebase and MySQL database.
